Objective

EDOC aims to track the performance of an index (before fees and expenses) that provides exposure to a portfolio of leading global digital healthcare companies.

Benefits

Exposure to the growth potential of the digital health and telemedicine thematic

Healthcare spending is projected to rise strongly as populations age and income levels increase. Spending is also likely to increasingly favour digital health solutions over the traditional way of delivering healthcare, as technological innovation helps improve efficiency, expand access, and shift the focus from treatment to prevention.

Exposure to leading digital healthcare companies

EDOC provides exposure to up to 50 of the leading global digital healthcare companies from sectors such as telehealth, medical devices, wearables, remote patient monitoring, and digital healthcare software.

Portfolio diversification

EDOC offers potential portfolio diversification benefits to Australian investors, given that digital healthcare is under-represented in the Australian market.
