

## Objective

IBUY aims to track the performance of an Index (before fees and expenses) that provides exposure to a portfolio of the world's leading online retailers.

## Benefits

### Exposure to the growth potential of the online retail sector

The online retail trend offers significant growth potential. The share of global retail spending accounted for by e-commerce has grown strongly in recent years, with this growth anticipated to continue.

### Exposure to leading global online retailers

IBUY provides exposure to up to 100 leading global e-commerce companies. To be eligible for inclusion in IBUY's index, companies must derive at least 65% of revenues (or > \$US90B) from one of three online retail business segments - online retail, online travel, or an online marketplace.

### Portfolio diversification

IBUY offers potential portfolio diversification benefits to Australian investors, given that e-commerce is a sector under-represented in the Australian market.

Fund returns are calculated in A\$ using net asset value per unit at the start and end of the specified period and do not reflect the brokerage or bid-ask spread that investors may incur when buying and selling units on the ASX. Returns are after fund management costs, assume reinvestment of any distributions and do not take into account income tax.

## Fund information

Betashares Funds can be bought or sold during the trading day on the ASX, and trade like shares.
