

Betashares Nasdaq 100 Yield Maximiser Fund (managed fund)

ASX: QMAX

30 April 2024

Objective

QMAX aims to provide regular income along with exposure to a portfolio of the top 100 companies listed on the Nasdaq stock market. In addition, the Fund aims to provide lower overall volatility than the underlying Nasdaq-100 Index. QMAX does not aim to track an index.

Benefits

Attractive income paid quarterly

Income is expected to exceed the yield of the underlying share portfolio over the medium term. QMAX seeks to enhance dividend income through an active 'covered call' strategy (further explained below).

Portfolio diversification

In one ASX trade, gain exposure to a portfolio of the largest 100 companies listed on the Nasdaq stock exchange.

Reduced volatility

The covered call strategy aims to provide lower overall portfolio volatility than the underlying Nasdaq-100 Index.

Cost-effective exposure

QMAX provides a cost-effective way to gain exposure to a covered call income strategy.

Graph shows fund performance relative to the NASDAQ-100 Index since fund inception. Fund returns are calculated in A\$ using net asset value per unit at the start and end of the specified period and do not reflect the brokerage or bid-ask spread that investors may incur when buying and selling units on the ASX. Returns are after fund management costs, assume reinvestment of any distributions and do not take into account income tax.

Fund information

Betashares Funds can be bought or sold during the trading day on the ASX, and trade like shares.

Distributions

12 mth distribution yield (%) 5.6%

Yield is calculated by summing the prior 12-month per unit distributions divided by the closing NAV per unit at the end of the relevant period. Yield will vary and may be lower at time of investment. **Past performance is not indicative of future performance.**

The Equity Yield Maximiser Strategy

QMAX invests in a portfolio that provides exposure to the stocks that make up the Nasdaq-100 Index (Share Portfolio) combined with call options written on QMAX's exposure to the Index.

The Index measures the performance of the top 100 stocks listed on the Nasdaq stock exchange. The Share Portfolio aims to generate dividends and capital growth.

In addition to the Share Portfolio, QMAX also sells (writes) exchange-traded index call options on up to 100% of QMAX's exposure to the Index. The options are generally written with terms of less than three months and strike prices that are approximately 2% to 7% above the then current level of the Index, subject to the prevailing levels of volatility.

By writing index call options, QMAX receives option premiums which are expected to provide an additional source of income for QMAX.

QMAX's strategy seeks to outperform a strategy of holding the Share Portfolio alone (i.e. without writing index call options) in falling, flat and gradually rising markets. However, QMAX's strategy can be expected to underperform in a strongly rising market, as QMAX does not participate in any rise in the Index above the strike prices of the index call options - moderating the potential capital growth of QMAX.

This information has been prepared by Betashares Capital Ltd (ABN 78 139 566 868 AFSL 341181) (Betashares), the issuer of the Fund. It does not take into account any person's objectives, financial situation or needs. Investors should consider the appropriateness of the information taking into account such factors and seek financial advice. Before making an investment decision, investors should read the Product Disclosure Statement (PDS), available at www.betashares.com.au, and consider whether the Fund is appropriate for their circumstances. A Target Market Determination (TMD), which sets out the class of consumers in the target market for the Fund, is also available at www.betashares.com.au/target-market-determinations. An investment in the Fund is subject to investment risk and the value of units may go down as well as up. Betashares does not guarantee the performance of the Fund, the repayment of capital or any rate of return.
