

Betashares Global Robotics and Artificial Intelligence ETF

ASX: RBTZ

30 April 2024

Objective

RBTZ aims to track the performance of an index (before fees and expenses) that includes global companies involved in the production or use of robotics and artificial intelligence (A.I.) products and services.

Strategy

RBTZ aims to track the Indxx Global Robotics & Artificial Intelligence Thematic Index before fees and expenses. The Index focuses on identifying the industries and sub-themes positively impacted by robotics and A.I. The Index includes companies involved in Industrial Robotics and Automation, Non-Industrial Robots, Artificial Intelligence and Unmanned Vehicles and Drones. To qualify for inclusion in the Index, a constituent must have a minimum market capitalisation of US\$100 million.

Benefits

Invest in disruptive innovation

RBTZ offers exposure to a transformational technological megatrend – the increasing adoption and utilisation of robotics and A.I.

Convenient, cost-effective access

In one trade, get diversified, cost-effective exposure to the world's leading robotics and A.I. companies, a sector that is heavily under-represented on the ASX.

Sector/geography agnostic

RBTZ's methodology invests directly in the robotics/A.I. theme, transcending sector, industry and geographic classifications.

Performance

PERIOD	1 mth	3 mth	6 mth	1 yr	3 yr (p.a.)	5 yr (p.a.)	10 yr (p.a.)	Inception (p.a.)
FUND	-5.12%	6.19%	29.59%	23.36%	1.68%	9.19%	-	8.13%

Fund returns are calculated in A\$ using net asset value per unit at the start and end of the specified period and do not reflect the brokerage or bid-ask spread that investors may incur when buying and selling units on the ASX. Returns are after fund management costs, assume reinvestment of any distributions and do not take into account income tax.

Fund information

Betashares Funds can be bought or sold during the trading day on the ASX, and trade like shares.

Distributions

12 mth distribution yield (%) 0.0%

Yield is calculated by summing the prior 12-month per unit distributions divided by the closing NAV per unit at the end of the relevant period. Yield will vary and may be lower at time of investment. **Past performance is not indicative of future performance.**

What is robotics and artificial intelligence?

Robotics involves the idea, design, creation, and application of programmable mechanical devices that can perform tasks and interact with their environments without human input.

A.I. is a division of computer science that emphasises the conception of intelligent machines that can work, react, and learn like humans in order to recognise speech, plan, and solve problems.

Robotics and Artificial Intelligence is a transformational technological development, with the ability to disrupt multiple industries due to significant economic incentives related to ageing populations, rising labour costs, and opportunity for performance improvements.

This information has been prepared by Betashares Capital Ltd (ABN 78 139 566 868 AFSL 341181) (Betashares), the issuer of the Fund. It does not take into account any person's objectives, financial situation or needs. Investors should consider the appropriateness of the information taking into account such factors and seek financial advice. Before making an investment decision, investors should read the Product Disclosure Statement (PDS), available at www.betashares.com.au, and consider whether the Fund is appropriate for their circumstances. A Target Market Determination (TMD), which sets out the class of consumers in the target market for the Fund, is also available at www.betashares.com.au/target-market-determinations. An investment in the Fund is subject to investment risk and the value of units may go down as well as up. Betashares does not guarantee the performance of the Fund, the repayment of capital or any rate of return.
