

Betashares Climate Change Innovation ETF

ASX: EARTH

29 February 2024

Objective

ERTH aims to track the performance of an index (before fees and expenses) that comprises a portfolio of up to 100 leading global companies that derive at least 50% of their revenues from products and services that help to address climate change and other environmental problems through the reduction or avoidance of CO2 emissions. This covers clean energy providers, along with leading companies tackling green transport, waste management, sustainable product development, and improved energy efficiency and storage.

Benefits

Exposure to an investment megatrend

Demand for products and services to tackle the world's growing climate and environment-related problems is anticipated to rise strongly over the long term.

Make a difference

By supporting companies that are leading the fight to create a more sustainable planet, investors in EARTH can be confident that their investment dollars are having a positive impact.

'Pure' exposure to climate change thematic

The 50% 'green revenue' threshold means that EARTH'S portfolio holdings provide relatively 'pure' exposure to the Climate Change thematic.

Broad range of climate innovation, ESG screens applied

ERTH provides exposure to a broad range of solutions, including clean energy, electric vehicles, energy efficiency technologies, sustainable food, water efficiency and pollution control. Companies with direct involvement in the fossil fuels industry (coal, oil and natural gas), and certain other negative activities are excluded.

Performance

PERIOD	1 mth	3 mth	6 mth	1 yr	3 yr (p.a.)	5 yr (p.a.)	10 yr (p.a.)	Inception (p.a.)

Impact

Carbon emissions

A dollar invested in EARTH's portfolio results in **39.1% lower** carbon emissions than a dollar invested in the Solactive EM DM Index¹.

Alignment to sustainable development goals (SDGs)

84% of EARTH's portfolio by weight contributes to the United Nations SDGs including: Combating Hunger and Malnutrition, Achieving Sustainable Agriculture and Forestry, Conserving Water, Contributing to Sustainable Energy Use, Promoting Sustainable Buildings, Optimising Material Use, Mitigating Climate Change, Preserving Terrestrial Ecosystems².

Fossil fuel exposure

Companies in EARTH's portfolio have nil% investment exposure to fossil fuel reserves. **100%** of the power generated by the companies in EARTH's portfolio comes from renewable sources compared to **20.1%** of the power generated by companies in the Solactive EM DM Index³.

Screening criteria

To qualify for the Index, companies must derive at least 50% of their business from 'green revenue', being revenue associated with activities that enable the reduction or avoidance of CO2 emissions, within one or more of the following categories:

- ▶ Green energy
- ▶ Green transportation
- ▶ Water and waste improvements
- ▶ Decarbonisation enabling solutions
- ▶ Sustainable products

EARTH's index methodology also applies a range of ESG screens to the portfolio, excluding companies directly involved in the fossil fuel industry, other companies with fossil fuel related revenues above a threshold, and certain other negative business activities.

The Index is weighted by modified market capitalisation, with a maximum weight per security of 4%.
