

Betashares Australian Ex-20 Portfolio Diversifier ETF

ASX: EX20

30 May 2025

Objective

EX20 aims to track the performance of an index (before fees and expenses) comprising the 180 largest stocks listed on the ASX, after excluding the 20 largest, based on their market capitalisation.

Benefits

Reduce portfolio concentration

With many portfolios having a heavy bias towards the big banks and miners, EX20 helps diversify exposure away from those stocks and sectors. In order to provide additional portfolio diversification, the Index methodology caps industry sector weight at 25% and single stock weight at 6%.

Portfolio completion

EX20 can be used as a cost-effective 'core' building block for investors seeking to 'complete' a portfolio that has high exposure to the largest 20 stocks.

Cost-effective

Management costs are only 0.25% p.a. (\$25 for every \$10,000 invested)*.

*Other costs apply. Please refer to the PDS.
