

ASX: AGVT

Diversify your portfolio and earn attractive income from Australian government bonds

The Betashares Australian Government Bond ETF (ASX: AGVT) provides exposure to a portfolio of high-quality Australian government bonds in one trade.

CREDIT QUALITY

Australian government bonds have the highest credit ratings in the Australian bond market¹.

DIVERSIFICATION AND DEFENCE

Australian government bonds historically have generally tended to rise in periods of significant equity market weakness, providing diversification and defensive benefits for investment portfolios.

ATTRACTIVE INCOME

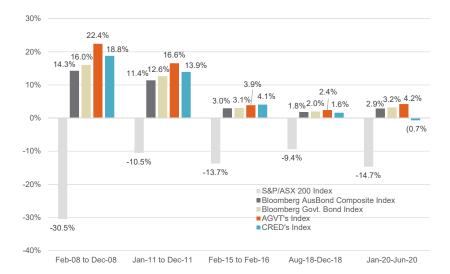

The Fund's focus on longer duration bonds means income potential is typically higher than other government bond funds that do not have this focus.

LOW COST

Management costs of only 0.22% p.a.²

AGVT's Index has typically outperformed shares and other Australian bond indices during equity market weakness.

Source: Bloomberg. AGVT's Index is the Solactive Australian Government 7-12 Year AUD TR Index. Shows performance of index, not ETF, and does not take into account ETF fees and costs. Past performance is not an indication of future performance of any index of ETF. You cannot invest directly in an index.

Buy and sell like any share on the ASX using the code: AGVT

'As at 31 July 2023. The weighted average credit rating of the bonds in AGVT's Index is AAA. The Index predominantly comprises Australian government bonds, with the remainder being supranational, government agency and similar bonds.

 2 Other costs, such as transaction costs, may apply. Refer to the PDS for more information.

Belashares Capital Ltd (ABN 78 139 566 868 AFS Licence 341181) is the issuer. Read the Target Market Determination and PDS at www.betashares.com.au and consider with your financial adviser whether the product is appropriate for your circumstances. The value of the units may go down as well as up.

How to use AGVT in a portfolio:

AGVT can be used to implement a variety of investment strategies.

For example:

- Core component of a fixed income allocation.
- Low cost option for investors seeking high levels of capital stability over the medium to long term and reliable income.
- Alternative or complement to a holding of corporate bonds.
