Exchange Traded Funds

ASX: GEAR

BetaShares Geared Australian Equity Fund (hedge fund)

A simple way to obtain cost-effective geared exposure to the Australian sharemarket

The BetaShares Geared Australian Equity Fund (hedge fund) (ASX: GEAR) offers cost-effective geared exposure to the returns of the broad Australian sharemarket, in a single ASX trade.

LEVERAGED EXPOSURE

GEAR gives you the opportunity to make magnified gains if the Australian sharemarket rises, but with the potential for magnified losses if the Australian sharemarket falls. GEAR's gearing ratio (the total amount borrowed expressed as a percentage of the total assets of the Fund) is managed between 50-65%.

ELIGIBLE FOR USE IN SMSFs

GEAR is one of the few types of geared investment structures eligible for use in an SMSF.

SIMPLE AND CONVENIENT TO ACCESS

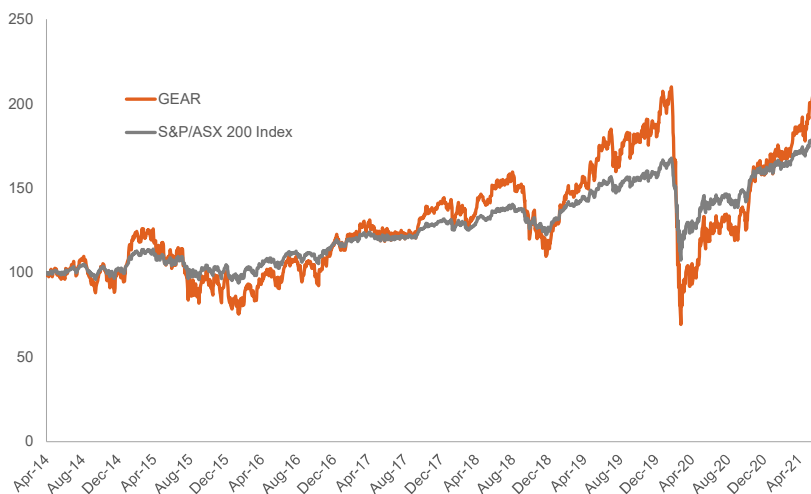

No loan application, no credit assessment and no need to borrow funds, with diversified exposure in a single ASX trade.

NO MARGIN CALLS

Investors in GEAR do not face the possibility of margin calls.

GEAR vs S&P/ASX 200 Index performance: April 2015 – 30 June 2021

Source: BetaShares, Bloomberg. Past performance is not indicative of future performance.

HOW TO USE GEAR IN A PORTFOLIO:

- Increase your sharemarket exposure in a capital-efficient way
- May be used in your SMSF to increase Australian sharemarket exposure, e.g. if you are near your concessional contribution cap

Gearing magnifies gains and losses, involves significantly higher risk than non-gearred investments, and may not be a suitable strategy for all investors.

Investment risks include market risk, gearing risk and lender risk. For more information on risks and other features of the Fund, please see the Product Disclosure Statement.

Buy and sell like any share on the ASX using the code: GEAR
