

Defence for your portfolio with high-quality global government bonds

The BetaShares Global Government Bond 20+ Year ETF - Currency Hedged (ASX: GGOV) provides exposure to a portfolio of long-dated bonds issued by G7 governments in one ASX trade.

HIGH CREDIT QUALITY

Bonds issued by the national governments of the G7 developed market economies are of very high credit quality.

DIVERSIFICATION AND DEFENCE

In periods of equity market weakness, government bonds historically have tended to rise in value, providing diversification and defensive benefits to investment portfolios. The Fund's focus on long-duration bonds further enhances these potential defensive benefits.

ATTRACTIVE INCOME, PAID QUARTERLY

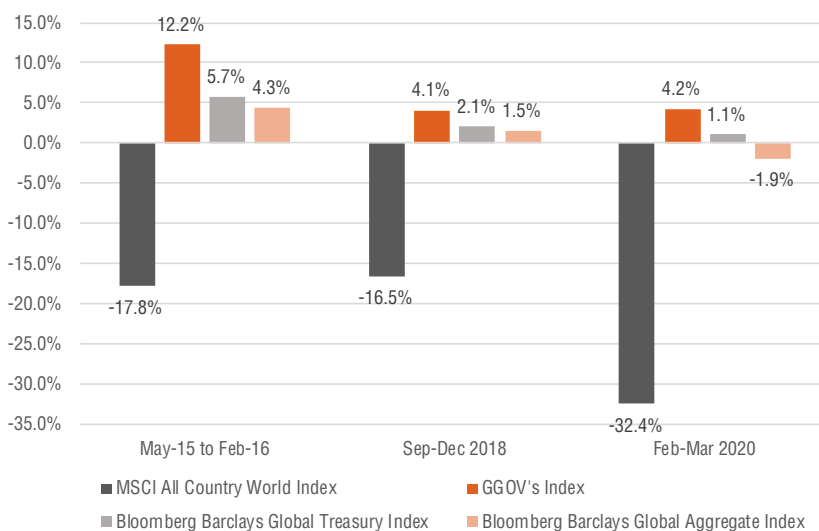

The Fund's focus on long-maturity bonds means income potential is higher than for comparable government bond funds without this focus.

LOW COST

Management costs of only 0.22% p.a.¹
