

## Instant exposure to the performance of the global gold mining sector via the ASX

The BetaShares Global Gold Miners ETF – Currency Hedged (ASX: MNRS) provides exposure to a diversified portfolio of the world's leading gold mining companies outside of Australia in a single ASX trade.

### AN INTERNATIONAL ALTERNATIVE

MNRS invests in the largest gold mining companies outside of Australia, allowing investors to simply and cost-effectively diversify away from Australian gold miners, who have historically made up only ~10% of the global gold mining market.

### PORTFOLIO DIVERSIFICATION

The performance of gold miners is historically driven by the price of gold bullion, which has traditionally tended to perform well during times of market volatility and uncertainty.

### CURRENCY HEDGED

MNRS is currency hedged to the Australian dollar, substantially eliminating the effects of currency fluctuations on returns.

### COST-EFFECTIVE

The management costs for MNRS are 0.57% p.a. (or \$57 for every \$10,000 invested), making MNRS a cost-effective investment for those seeking exposure to global gold miners.

## Over 90% of gold production happens outside of Australia

Australia's gold production in comparison to World production in 2017

### How to use MNRS in an investment portfolio

MNRS can be used by investors for a variety of investment strategies, for example:

A core building block for a global equities allocation

Tactical exposure to the global gold mining sector

#### ASX: MNRS is part of our global sector fund series

The Global Sector Series is designed to provide investors with a convenient and cost-effective way to access the largest companies in some of the world's most important industry sectors in a single ASX trade.

Investment risks include market risk, emerging markets risk, gold mining company risk and concentration risk. Refer to PDS.

## Invest as you would for any share on the ASX using the code: MNRS
