

Invest in the nuclear energy renaissance

The Betashares Global Uranium ETF (ASX: URNM) provides cost-effective exposure to leading companies in the global uranium industry.

GROWTH POTENTIAL

Nuclear energy is increasingly being accepted as a safe, reliable, low-carbon energy source and seen as a critical supplementary means of meeting the world's growing energy demands. As a result, demand for uranium to fuel nuclear power stations is projected to grow strongly¹.

EXPOSURE TO LEADING COMPANIES IN THE URANIUM INDUSTRY

URNM provides exposure to a portfolio of leading global companies involved in the mining, exploration, development and production of uranium, modern nuclear energy, or that hold physical uranium or uranium royalties.

PORTFOLIO DIVERSIFICATION

URNM offers access to a portfolio of leading uranium companies across a number of geographic regions, reducing stock and region-specific risk compared to investing in individual companies in the uranium industry.

COST-EFFECTIVE

With management costs of only 0.69% p.a. (or \$69 for every \$10,000 invested), URNM is a cost-effective way to gain exposure to the nuclear energy renaissance.²

Average life-cycle CO2 equivalent emissions of electricity options

How to use URNM in a portfolio:

- Tactical allocation to the nuclear energy thematic.
- As a complement to broad market core exposures.

URNM is part of the Betashares range of thematic ETFs, which have been designed to provide investors with exposure to thematic growth opportunities in a single ASX trade.

Buy and sell like any share on the ASX using the code: URNM
