

BetaShares Australian Equities Bear Hedge Fund

 **ASX: BEAR**

30 November 2018

BetaShares
Exchange Traded Funds

Investment Objective

The Fund provides investors with a simple way to profit from, or protect against, a declining Australian sharemarket. It seeks to generate returns that are negatively correlated to the returns of the Australian sharemarket (as measured by the S&P/ASX 200 Accumulation index).

Portfolio Exposure

Market movements may cause the Fund's exposure to vary between 90% to 110% short on a given day. Therefore a 1% fall in the Australian sharemarket on a given day can generally be expected to deliver a 0.9% to 1.1% increase in the value of the Fund (and vice versa).

The portfolio exposure is actively monitored and adjusted to stay within this range. The Fund should not be expected to provide the exact opposite of the market return over any time period. As such, investors should check BetaShares' website for details of the Fund's historical performance, as well as the current portfolio exposure, to ensure that the Fund continues to meet their investment objectives.

Performance

Value of \$100 invested since inception

PERIOD	FUND RETURN	S&P/ASX 200 RETURN
1 mth	2.10%	-2.21%
3 mth	10.72%	-9.29%
6 mth	4.39%	-3.68%
1 yr	3.01%	-0.97%
3 yr (p.a)	-6.24%	7.69%
5 yr (p.a)	-4.42%	5.82%
Inception	-7.36%	9.74%

Graph shows performance of Fund relative to S&P/ASX 200 index since inception. Please note, the Bear Fund's portfolio is managed actively and should not be expected to provide the exact opposite of the market return over any time period. Fund returns are calculated in A\$ using net asset value per unit at the start and end of the specified period and do not reflect the brokerage or the bid ask spread that investors incur when buying and selling units on the ASX. Returns are after fund management costs, assume reinvestment of any distributions and do not take into account income tax. Returns for periods longer than one year are annualised. Past performance is not an indicator of future performance. Source: BetaShares, Bloomberg

Distributions

12 mth distribution yield (%) 0.0%

Yield figures are calculated by summing the prior 12 month fund per unit distributions divided by the fund closing NAV per unit at quarter-end. Past performance is not an indicator of future performance.

Asset Allocation

● Short Australian Equities ~100.0%

Trading Information

BetaShares Funds can be bought or sold during the trading day on the ASX, and trade like shares.

Investment Strategy

The Fund invests in cash and cash equivalents and sells equity index futures contracts (i.e. ASX SPI 200 futures). Selling these futures can typically be expected to generate a positive return when the S&P/ASX Accumulation 200 Index declines (and a negative return when the S&P/ ASX 200 Accumulation Index increases).

The Fund's strategy of seeking returns that are negatively correlated to market returns is the opposite of most managed funds. Note that the Fund does not track a published benchmark and past performance is not an indication of future performance.

Benefits of BetaShares Australian Equities Bear Hedge Fund

- ▶ **Simple access to short exposure** – ability to obtain returns that are negatively correlated to the Australian sharemarket as simply as buying any share
- ▶ **Convenience** – avoid the complications and costs of other investments providing 'short' exposure, such as CFDs, futures, short selling individual equities
- ▶ **No margin calls for investors** – investors cannot lose more than their initial investment
- ▶ **Liquidity** – available to trade on ASX like any share
- ▶ **Transparent** – portfolio exposure, value of the Fund's assets, net asset value per unit and portfolio holdings available daily on our website

How to use the BetaShares Australian Equities Bear Hedge Fund in your portfolio

The Fund can be used to implement a variety of investment strategies. For example:

- ▶ Hedge portfolios against falling markets
- ▶ Seek profits when markets decline
- ▶ Alternative to using futures, swaps or other derivatives – easier to trade and administer
- ▶ Pairs Trading – for example going long the Fund and long an individual stock to seek to reduce the impact of market movements on a stock's performance
- ▶ Obtain short exposure instead of selling equities and crystallising capital gains

An investment in any BetaShares Fund ("Fund") is subject to investment risk including possible delays in repayment and loss of income and principal invested.
