Source: Betashares, Bloomberg. Portfolio returns are calculated by reference to the portfolio's value at the start and end of the specified period, assume reinvestment of any distributions back into the portfolio, and do not take into account tax paid as an investor. Returns are after management costs incurred, but do not reflect the transaction costs (e.g. brokerage) that investors incur when implementing their portfolios. Past performance is not an indicator of future performance.

Yield and Portfolio Characteristics

YIELD (% P.A.)¹ 3.32%

GROSS YIELD (% P.A.)¹ 3.41%

¹ Yield calculated by summing the prior 12 month net and gross fund per unit distributions, pro-rated for portfolio weight, divided by model closing value at quarter end. Past performance is not an indicator of future performance.

About Betashares

Betashares is a leading Australian manager of exchange traded funds (ETFs) and other exchange traded products, which trade on the Australian Securities Exchange (ASX). Betashares' aim is to create intelligent investment solutions that broaden the investment possibilities for Australian investors and their advisers.

As an Australian born and managed firm, Betashares thinks deeply about factors affecting Australian investors and builds products specifically for Australian clients. Betashares' local focus has allowed the team to build the largest and most innovative suite of exchange traded products in Australia.

About Betashares Ethical Growth Portfolio

The Betashares Ethical Growth Portfolio provides exposure to a cost-effective, 'true-to-label' ethical portfolio, and seeks to provide an investment return over the long term consistent with a growth risk profile through a passive blending of asset classes including Australian and international equities, and Australian and international bonds, according to the strategic asset allocation set for the relevant fund.

The Betashares Ethical Growth Portfolio is built using a strategic asset allocation (SAA) consistent with a medium to high risk-return profile, using 70% allocation to growth assets (international and Australian shares) and 30% allocation to defensive assets (international and Australian bonds). The SAA is set by applying forward-looking, long-term expected returns and risk for each asset class.

The portfolio's asset allocation and underlying exposures are reviewed by the Betashares Investment Committee and rebalanced periodically to ensure they remain consistent with target allocations and risk profile.

To that end, Betashares Ethical Growth Portfolio obtain their asset-class exposure using ETFs from the Betashares range of ethical ETFs, with the Australian equity exposure provided through a direct portfolio of approximately 35 stocks.
