Fund returns are calculated in A\$ using net asset value per unit at the start and end of the specified period and do not reflect the brokerage or bid-ask spread that investors may incur when buying and selling units on the ASX. Returns are after fund management costs, assume reinvestment of any distributions and do not take into account income tax.

¹Inception date refers to the inception of the Fund's current investment strategy on 15 December 2020. Prior to the inception date, the Fund traded under a different investment strategy as the BetaShares Diversified Growth ETF and was subject to different management costs. Information about the Fund's performance prior to the inception date is available on request by emailing info@betashares.com.au or calling 1300 487 577.

UNDERLYING ETFs' INDEX YIELD

YIELD (% P.A.)	2.2%
FRANKED YIELD (% P.A.)	2.3%

Source: Bloomberg. Yield is calculated by summing the 12-month trailing index yields for the underlying ETFs in the portfolio in proportion to the underlying ETF weightings. Yield does not take into account the impact of fees and costs incurred in the underlying ETFs or DGGF, or any withholding taxes on distributions received from offshore investments. Yield may differ due to these and other factors, including changes in the number of units on issue. Franked yield is inclusive of franking credits. Not all Australian investors will be able to receive the full value of franking credits. Yield will vary and may be lower at time of investment. **Past performance is not an indicator of future performance.**

ABOUT BETASHARES ETHICAL DIVERSIFIED ETFs

Each BetaShares Ethical Diversified ETF provides exposure to a cost-effective, 'true to label' ethical portfolio, and seeks to provide an investment return over the long term consistent with a particular risk profile (balanced, growth or high growth) through a passive blending of asset classes including Australian and international equities, and Australian and international bonds, according to the strategic asset allocation set for the relevant fund.

Each BetaShares Ethical Diversified ETF's portfolio is built using a strategic asset allocation (SAA) consistent with its risk-return profile, using varying allocations to growth assets (international and Australian shares) vs. defensive assets (international and Australian bonds). The SAA is set by applying forward-looking, long-term expected returns and risk for each asset class.

Each BetaShares Ethical Diversified ETF's asset allocation and underlying exposures are reviewed regularly by the BetaShares Investment Committee and adjusted periodically to ensure they remain consistent with target allocations and risk profile.

To that end, BetaShares Diversified ETFs obtain their asset-class exposure using ETFs from the BetaShares range of ethical ETFs.

WHO MIGHT THE FUND SUIT?

DGGF may suit investors whose priority is investing in a way that aligns with their values, with an investment timeframe of at least 7 years, who have a 'medium to high' tolerance for risk¹ and who are therefore willing to accept a medium to high degree of volatility in their portfolio in order to achieve their long-term objective.

¹ Risk profiles defined in accordance with the Australian Prudential Regulation Authority's (APRA) 'standard risk measure', or SRM. The SRM is based on industry guidance to allow investors to compare investment options that are expected to deliver a similar number of negative annual returns over any 20-year period. The SRM is not a complete assessment of all forms of investment risk, for instance it does not detail what the size of a negative return could be or the potential for a positive return to be less than an investor may require to meet their objectives. Further, it does not take into account the impact of administration fees and tax on the likelihood of a negative return. Investors should still ensure they are comfortable with the risks and potential losses associated with their chosen investment option.
