Betashares Diversified High Growth ETF

betashares

ASX: DVHG

4 August 2026

Objective

DVHG aims to provide low-cost exposure to a 'high-growth' diversified portfolio. The Fund may suit investors with a high to very high tolerance for risk.

Strategy

DVHG is a diversified all-in-one investment solution, with a 90% allocation to growth assets and a 10% allocation to defensive assets.

The Fund's growth allocation is invested in a blend of large and mid-cap equities from Australian, global developed and emerging markets. The defensive allocation is invested in Australian and global investment-grade bonds. This offers investors exposure to a 'high-growth' multi-asset portfolio with the potential for capital growth over the long term. The Fund provides exposure to approximately 2,500 equities and 12,000 bonds in one ASX trade.

The Fund is constructed using a blend of cost-effective Betashares ETFs traded on the ASX.

Benefits

An all-in-one diversified portfolio

In a single ETF, DVHG provides diversified exposure to around 2,500 companies and 12,000 bonds across Australian and global markets. Spreading your investments over a range of regions, asset classes and sectors can help to reduce portfolio volatility.

Low cost

Management fees of 0.19% p.a.* - the lowest fee amongst all-in-one diversified ETFs currently available on the Australian market.

Professionally constructed to meet your risk appetite

DVHG has been designed for an investor seeking long-term capital growth, with a high to very high risk appetite. The Fund allocates 90% to growth assets and 10% to defensive assets.

Underlying ETFs' index yield

Yield (% p.a.)	2.4%
Franked yield (% p.a.)	2.7%

Source: Bloomberg. Yield is calculated by summing the 12-month trailing index yields for the underlying ETFs in the portfolio in proportion to the underlying ETF weightings. Yield does not take into account the impact of fees and costs incurred in the underlying ETFs, or any withholding taxes on distributions received from offshore investments. Yield may differ due to these and other factors, including changes in the number of units on issue. Franked yield is inclusive of franking credits. Not all Australian investors will be able to receive the full value of franking credits. Yield will vary and may be lower at time of investment. **Past performance is not an indicator of future performance.**

About the Betashares Diversified High Growth ETF

DVHG's passively blended portfolio targets an allocation of 90% to growth assets (Australian equities and international equities, including emerging markets, developed markets and global listed infrastructure) and 10% to defensive assets (Australian and international fixed income).

DVHG obtains its exposure using a selection of cost-effective Betashares ETFs traded on the ASX.

Underlying exposures are reviewed regularly by the Betashares Investment Committee and adjusted periodically to ensure they remain consistent with DVHG's objectives.
