Exchange Traded Funds

## Investment Objective

The Fund aims to track the performance of an index (before fees and expenses) that provides exposure to 100 large global stocks (excluding Australia) which are climate change leaders (as measured by their relative carbon efficiency) and which are not materially engaged in activities deemed inconsistent with responsible investment considerations.

## Performance

Value of \$100 invested since inception

PERIOD	FUND RETURN	INDEX RETURN
1 mth	1.31%	1.33%
3 mth	1.48%	1.58%
6 mth	13.22%	13.47%
1 yr	22.01%	22.51%
3 yr (p.a)	-	-
5 yr (p.a)	-	-
Inception	19.45%	19.75%

Fund returns are calculated in A\$ using net asset value per unit at the start and end of the specified period and do not reflect the brokerage or the bid ask spread that investors incur when buying and selling units on the ASX. Returns are after fund management costs, assume reinvestment of any distributions and do not take into account income tax. Returns for periods longer than one year are annualised. Past performance is not an indicator of future performance. Source: BetaShares, Bloomberg.

## Investment Strategy

The Fund will generally invest in a portfolio of global equity securities that comprise the Index in proportion to the weightings of the securities in the Index.

The Index includes 100 large global stocks from developed market countries (excluding Australia) that have been identified as “Climate Leaders” and that have also passed certain eligibility screens designed to exclude companies with direct or significant exposure to the fossil fuel industry or that are engaged in other activities deemed inconsistent with responsible investment considerations.

- ▶ **Climate Leaders** are companies that have a carbon impact which is at least 60% lower than the average carbon impact for a company’s industry, or are otherwise superior performers in relation to “Scope 4” carbon emissions (also known as “avoided emissions”).
  - *Carbon impact*: calculated based on the total greenhouse gas emissions from a company’s operations, fuel use, supply chain and business activities, divided by its market capitalisation.
  - *Avoided emissions*: superior performers are those companies involved in commercialising technologies that have net positive climate benefits through substantial greenhouse gas emission reductions (e.g., primary business activities in renewable energy, energy efficiency, sustainable agriculture and land use, and carbon sequestration).
  - *Fossil Fuel Screen* is applied to the universe of Climate Leaders which removes companies with any direct involvement in the fossil fuel industry, as well as companies with material indirect exposure and those with particularly high use of fossil fuels.
- ▶ **Eligibility screens** are applied to remove companies which have exposure to other activities deemed inconsistent with responsible investment considerations (subject to certain materiality thresholds):
  - Gambling
  - Tobacco
  - Armaments
  - Uranium and nuclear energy
  - Destruction of valuable environments
  - Animal cruelty
  - Chemicals of concern
  - Mandatory detention of asylum seekers
  - Alcohol
  - Junk foods
  - Pornography
  - ESG related reputational risk or controversy
  - Human rights and supply chain concerns

For more information on the Index see the Index methodology document available on our website.

The Index is weighted by market capitalisation, with a maximum weight per security of 4% and a minimum weight of 0.5% at each annual rebalance date.

## Benefits of BetaShares Global Sustainability Leaders ETF
