Objective

EXUS aims to track the performance of an index (before fees and expenses) that provides exposure to 900+ large and mid-cap companies from 22 developed markets excluding the US and Australia.

Benefits

Global diversification beyond the US

With the US historically representing the majority of developed markets, adding exposure outside the US provides both geographic and sector diversification. Compared to US focused exposures, EXUS has a higher weighting to sectors such as financials and industrials, and a lower weighting to technology.

A core portfolio building block

EXUS offers an efficient, low-cost building block to developed markets across Europe, Asia-Pacific and Canada. Used alongside US and Australian exposures, EXUS enables investors to create more diversified portfolios with potentially lower volatility.

Tax-efficient structure

EXUS holds the underlying shares directly, providing Australian investors access to any available foreign tax credits from dividends received, which may improve after-tax returns compared to investing in a non-Australian domiciled ETF.

Graph shows performance of the underlying index, and not the fund. It does not take into account fund fees and costs. Index performance based on reinvestment of income. Index inception date is 8 May 2006. Index 'live' date is 8 February 2023. Index performance prior to 'live' date is back-tested by the index provider using the index methodology at 'live' date. You cannot invest directly in an index. Fund returns are calculated in A\$ using net asset value per unit at the start and end of the specified period and do not reflect the brokerage or bid-ask spread that investors may incur when buying and selling units on the ASX. Returns are after fund management costs, assume reinvestment of any distributions and do not take into account income tax.
