Investment Strategy

The Fund will generally invest in a portfolio of Australian securities that comprise the Index in proportion to the weightings of the securities in the Index.

Screening Criteria

From the universe of eligible ASX listed securities, the Index methodology removes companies which are exposed to activities considered to carry significant negative environmental, social and governance (ESG) risks, including:

- ▶ Fossil Fuels – including any direct and any material indirect exposure + any companies with high use of fossil fuels
- ▶ Gambling
- ▶ Tobacco
- ▶ Armaments
- ▶ Uranium and nuclear energy
- ▶ Destruction of valuable environments
- ▶ Animal cruelty
- ▶ Chemicals of concern
- ▶ Mandatory detention of asylum seekers
- ▶ Alcohol
- ▶ Junk foods
- ▶ Pornography
- ▶ Human rights and supply chain concerns
- ▶ Lack of gender diversity at the board level
- ▶ Payday lending

Sustainability Leaders

From the companies passing the above screens, the Index preferences companies classified as “Sustainability Leaders”, which means that the company must satisfy at least one of the following criteria:

- ▶ More than 20% revenue derived from one or more of the following: renewable energy; energy efficiency; water efficiency; recycling; waste remediation and re-use of materials; public transport and energy efficient transport; education; healthcare; animal health; healthy foods and nutrition products; green star rated buildings; community and regional banking; health insurance and personal insurance; social services and social infrastructure (e.g. employment services, child care); sustainability certified products and services (e.g. Fairtrade, certified organic); sustainable forestry; access to knowledge and information; access to communications;
- ▶ Recipient of either an “A” or “B” grade (or equivalent) rating from a trusted ethical consumer report;
- ▶ Certified B Corporation (a certification issued by B Lab, which is available to companies that meet specified governance, transparency, environmental and social impact standards).

Note that not every security in the Index is necessarily a Sustainability Leader (but every security will have met the above Screening Criteria).

The Index uses a modified market capitalisation weighting method, includes sector concentration limits, gives preferential weighting to Sustainability Leaders, and applies a maximum weight per security of 4% at each annual rebalance date.

For more information on the Index see the Index methodology document available on our website.
