

31 March 2025

Objective

MTUM aims to track the performance of an index (before fees and expenses) comprising a portfolio of Australian companies with above average momentum scores, as measured by risk-adjusted returns.

Benefits

Proven investment approach

Momentum investing is a proven approach that seeks to identify stocks that show a recent trend of outperforming the broad market, based on the theory that such trends are likely to persist.

Portfolio diversification

Momentum investing provides a unique return profile that can be used in combination with other active and passive equity funds.

Convenient, systematic way to implement momentum investing

Momentum investing can be difficult to implement and is susceptible to human bias. MTUM's index is purely rules-based, prioritising stocks with strong and consistent momentum, while cutting the worst performers quickly.
