

29 OCTOBER 2021

### OBJECTIVE

POU aims to track the performance of the British pound against the Australian dollar (before fees and expenses). If the British pound goes up 10% against the Australian dollar, POU is designed to go up 10% too, before fees and expenses. Conversely, POU will go down if the British pound falls against the Australian dollar.

### BENEFITS

#### SIMPLE TO ACCESS, CONVENIENT AUD/GBP EXPOSURE

POU can be bought and sold like any share on the ASX, avoiding the inconvenience and complexity of trading CFDs, or dealing in FX markets

#### LOW COST

Management costs are 0.45% p.a.\* - for most investors, the total costs of ownership can be expected to be significantly cheaper than many alternative ways of getting exposure to the performance of the British pound

#### PORTFOLIO DIVERSIFICATION

Currency exposure can diversify your portfolio as currencies historically have shown low correlation to shares and other major asset classes

\* Additional costs, such as transaction costs, may apply. Refer to the Product Disclosure Statement for more information.
