

# Betashares U.S. Dollar ETF

30 April 2024

## Objective

USD aims to track the performance of the US dollar against the Australian dollar (before fees and expenses).

If the US dollar goes up 10% against the Australian dollar, USD is designed to go up 10% too, before fees and expenses. Conversely, USD will go down if the US dollar falls against the Australian dollar.

## Benefits

### Simple to access, convenient AUD/USD exposure

USD can be bought and sold like any share on the ASX, avoiding the inconvenience and complexity of opening a foreign currency bank account, trading CFDs, or dealing in FX markets.

### Low cost

Management costs are 0.45% p.a.\* - for most investors, the total costs of ownership can be expected to be significantly cheaper than many alternative ways of getting exposure to the performance of the US dollar.

### Portfolio diversification

Currency exposure can diversify your portfolio, as currencies historically have shown low correlation to shares and most other major asset classes.

\*Other costs apply. Please refer to the PDS.
