Betashares Artificial Intelligence ETF

ASX: CHAT

4 November 2026

Objective

CHAT aims to track the performance of an index (before fees and expenses) that provides exposure to a portfolio of global companies involved in the development and delivery of artificial intelligence.

Benefits

Access the growth potential of AI

AI adoption is accelerating, with investment spanning every layer of the technology stack. CHAT invests across that supply chain, from companies designing and making semiconductors to providers of compute infrastructure, model developers and AI software.

Focused on 'pure play' AI companies

CHAT provides a focused exposure to the AI ecosystem, with companies selected and weighted according to their level of involvement in artificial intelligence. This gives investors targeted exposure to companies for which AI is a core part of their business.

Portfolio diversification

CHAT provides access to around 50 global AI companies in a single ASX ETF. It offers potential portfolio diversification benefits to Australian investors, given the limited representation of AI related companies in the Australian sharemarket.

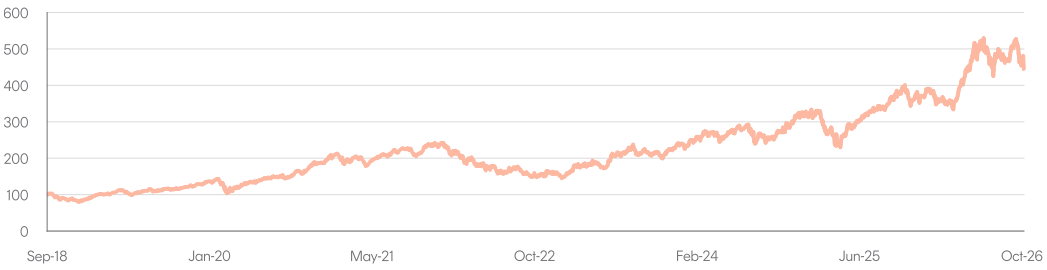

Performance*

PERIOD	1 mth	3 mth	6 mth	1 yr	3 yr (p.a.)	5 yr (p.a.)	10 yr (p.a.)	Inception (p.a.)#

Value of $100 invested since index inception

Source: Betashares, Bloomberg. **Past performance is not indicative of future performance.**
Graph shows performance of the underlying index, and not the fund. It does not take into account fund fees and costs. Index performance based on reinvestment of income. Index inception date is 18 September 2018. Index 'live' date is 16 October 2026. Index performance prior to 'live date' is back-tested by the index provider using the index methodology at 'live' date. You cannot invest directly in an index. Fund returns are calculated in A$ using net asset value per unit at the start and end of the specified period and do not reflect the brokerage or bid-ask spread that investors may incur when buying and selling units on the ASX. Returns are after fund management costs, assume reinvestment of any distributions and do not take into account income tax.

There are risks associated with an investment in CHAT, including market risk, international investment risk, AI industry risk,concentration risk and currency risk. Investment value can go up and down. The Fund's concentrated sector exposure can be expected to be more volatile than a broad global equity exposure. An investment in the Fund should only be considered as a part of a broader portfolio, taking into account your particular circumstances, including your tolerance for risk. For more information on risks and other features of the Fund, please see the Product Disclosure Statement and Target Market Determination, both available on this website.
