## Objective

JNDQ aims to track the performance of the Nasdaq Next Generation 100 Index® (before fees and expenses). The Index provides exposure to the 100 largest Nasdaq-listed non-financial companies by market capitalisation outside of the Nasdaq-100 Index®.

## Benefits

### Today's emerging innovators, tomorrow's leaders

JNDQ provides exposure to a collection of innovative companies with the potential to become tomorrow's leaders in sectors including technology, healthcare and industrials.

Examples of leading companies that graduated from the Nasdaq Next Generation 100 Index to the Nasdaq-100 include Tesla, Netflix and Docusign.

### Access growth potential early in the journey

Many of the companies in JNDQ's Index are at a relatively early stage of their development. JNDQ provides exposure with meaningful weightings to companies having potential for significant growth.

### Diversification

JNDQ's Index offers broad diversification at both a company and sector level relative to the the Nasdaq-100 Index. No security weight can exceed 4%, resulting in relatively low stock concentration risk. While technology is the most heavily represented sector in JNDQ's Index, sectors including healthcare, consumer discretionary and industrials also have substantial weightings, resulting in a more diversified exposure overall.
