SUPPLEMENTARY PRODUCT DISCLOSURE STATEMENT

DATED: 27 AUGUST 2026
ISSUER: BETASHARES CAPITAL LTD
ABN: 78 139 566 868
AFS LICENCE: 341181

This Supplementary Product Disclosure Statement ("SPDS") is supplemental to the Product Disclosure Statement dated 18 July 2022, as supplemented by the Supplementary PDS dated 12 December 2024, in respect of Betashares Video Games and Esports ETF, Betashares Electric Vehicles and Future Mobility ETF and Betashares Global Uranium ETF (together, the "PDS").

The PDS and this SPDS should be read together.

A copy of this SPDS has been lodged with the Australian Securities and Investments Commission ("ASIC") on 27 August 2026. Neither ASIC nor ASX Limited takes any responsibility for the contents of this SPDS.

Terms defined in the PDS have the same meanings when used in this SPDS.

This SPDS amends certain information relevant to Betashares Global Uranium ETF ("Fund"). No changes are being made to the other funds under the PDS.

Revisions to URNM's underlying index methodology

As stated in the PDS, the investment objective of the Fund is to provide an investment return that aims to track the performance of the Indxx North Shore Uranium Mining Index("Index"), before taking into account fees and expenses.

Effective from 30 September 2026, certain changes will be made to the Index screens by the Index Provider that aim to enhance the index.

The changes are summarised below:

	Current criteria	**Effective on 30 September 2026 following close of ASX trading**
Changes to constituent market capitalisation eligibility requirements	Securities must have a minimum market capitalisation of US$40 million.	Securities must have a minimum market capitalisation of US$125 million.
Introduction of liquidity eligibility requirements	Not applicable.	Securities must have a minimum three-month average daily value traded (ADTV) of US$100,000.

Introduction of a minimum constituent count requirement	Not applicable.	The Index targets a minimum constituent count of 25 securities. Where fewer than 25 securities meet all eligibility criteria at a reconstitution, additional securities are included by reducing the free float market capitalisation threshold until 25 companies are selected.
Changes to weighting methodology	An aggregate weight of 82.5% is assigned to uranium miners, explorers, developers and producers; and an aggregate weight of 17.5% is assigned to entities holding physical uranium, uranium royalties or other non-mining assets. Components within each bucket are market capitalisation weighted. A single security weight cap of 15% and a single security floor of 0.30% applies.	The same 82.5% / 17.5% category allocation is retained, but components within each bucket are free-float market capitalisation weighted. A single security weight cap of 15% and a single security floor of 0.20% applies.
Removal of cap on the largest Index holdings	No more than five companies will have a weighting greater than 4.7%, and the aggregate weight of all components with a weight greater than 5% is capped at 50%.	Removed.

The following specific changes are made to the PDS, effective on 30 September 2026 after the close of ASX trading.

Product Supplement – Further information about the Index

In the Product Supplement for the Fund, the information under the heading "Further information about the Index" is deleted and replaced with:

> The index sponsor is Indxx, LLC ("Indxx").
>
> To be eligible for initial inclusion in the Index and at each reconstitution, a security must:
>
> - have or expect to have a significant part of its business operations related to the uranium industry, which includes uranium mining, exploration of uranium, physical uranium investments and technologies related to the uranium industry;
> - have a minimum market capitalisation of US$125 million; and
> - have a minimum three-month average daily value traded (ADTV) of US$100,000.
>
> Index constituents are subject to the following weight caps and constraints initially and at each rebalance:
>
> - no constituent's weight may exceed 15% or be below 0.20%;
> - an aggregate weight of 82.5% is assigned to uranium miners, explorers, developers and producers;
> - an aggregate weight of 17.5% is assigned to entities which hold physical uranium, uranium royalties or other non-mining assets;
>
> The securities within each of the above categories are weighted based on their free float market capitalisation, subject to the capping levels described above.
>
> The Index targets a minimum constituent count of 25 securities. If fewer than 25 securities satisfy the eligibility criteria at a reconstitution, additional securities may be included by reducing the free float market capitalisation threshold, in

descending order by free float market capitalisation, until the count of 25 securities is met, provided all other eligibility criteria continue to be satisfied.

The Index is reconstituted and rebalanced semi-annually in March and September. The Index is a net total return index, which means that it reinvests cash dividends on the relevant ex-dividend date (the date on which the relevant shares no longer come attached with the right to receive the declared dividend) and adjusts for an Index security's country of incorporation withholding rate.

In order to reduce Index turnover, certain buffer rules are applied.

The nature and method of calculation of the Index may change from time to time.

Neither the Responsible Entity nor any other company in the Betashares group has any control over, or responsibility for, the composition, calculation or availability of the Index.

The Index Provider is not a related company of the Responsible Entity.

Past performance information about the Index is available from various sources, including stockbrokers, financial information websites and major data providers such as Bloomberg or Reuters. Any past performance information about the Index does not take into account fees, costs or taxes that may be incurred as a result of investing in the Fund. Past performance of the Index is not a reliable guide to future performance of the Index or the Fund.

The Index methodology document is available on the Fund's product page at www.betashares.com.au.

A listing of the Fund's portfolio holdings, updated daily, will be available at www.betashares.com.au.
